

Same series observation

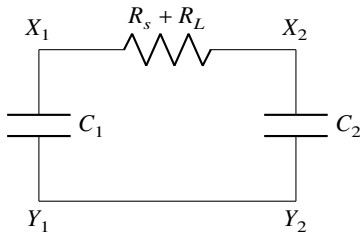

$$C_1 = C_2 = 1 \text{ F}, \quad v_1 + v_2 = 2 \text{ V initially}$$

$$(v_1, v_2) = (1, 1) \text{ V} : E_C = 1 \text{ J}$$

$$(v_1, v_2) = (3, -1) \text{ V} : E_C = 5 \text{ J}$$

New parallel paths

Finite exchange paths divide work.
 Cell orientations persist.
 The earlier series link is opened.
